### INTERNATIONAL SEARCH REPORT

In ational Application No PCT/US2004/026431

	10170	332004/ 020431					
A CLASSIFICATION OF SUBJECT MATTER IPC 7 A61K39/02 A61K39/385 A61K39/39							
According to International Patent Classification (IPC) or to both national classification and IPC							
B FIELDS SEARCHED							
Minimum documentation scarched (classification system followed by classification symbols) IPC 7 A61K							
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched							
Electronic data base consulted during the international search (name of data base EPO-Internal , BIOSIS, EMBASE, PAJ, WPI Date	•	ins uscuj					
C DOCUMENTS CONSIDERED TO BE RELEVANT							
Category ° Citation of document, with indication, where appropriate, of the re-	levant passages	Relevant to claim No					
LEE C-J: "Quality control of polyvalent pneumococcal polysacchari de-protein		1-14					
BIOLOGICALS, ACADEMIC PRESS LTD., GB,	vol. 30, no. 2, June 2002 (2002-06), pages 97-103, XP002330498 ISSN: 1045-1056						
Y US 4 356 170 A (JENNINGS ET AL) 26 October 1982 (1982-10-26) example 1	-/	1-14					
Further documents are listed in the continuation of box C  Patent family members are listed in annex							
"A" document defining the general state of the art which is not considered to be of particular relevance  "E" earlier document but published on or after the international filing date  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)  "O" document referring to a noral disclosure, use, exhibition or other means  "P" document published pπor to the international filing date but later than the priority date claimed invention annot be considered to involve an inventive step when the document is taken alone cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combined to involve an inventive step when the document is combined with one or more other such document is combined with one or more other such document is combined to invention cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined to invention cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined to invention cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined to invention cannot be considered to involve an inventive step when the document is combined to invention cannot be considered to invention cannot be considered to inven
